

Features/Benefits

- Longest Battery Life on the market - Can operate for up to several months on three AA batteries – thanks to the automatic shutoff feature.
- Captures real-time audio & video on any standard TV/VCR with the touch of a button
- A weather resistant housing for use outdoors and adjustable lens to focus on objects far and near
- Long range keyfob transmitter small enough to be carried in a front pocket
- Auto encryption allows over 16,000,000 addresses for uniqueness and security
- Channel Scan allows the receiver to automatically switch between cameras in 5 second increments when in continuous power mode
- Channel Skip allows the user to skip over certain cameras when using the channel scan feature
- The KwikPeek is entirely portable - you can move the camera to fit your needs, easily mounting it to almost any surface – and with the Wireless Receiver accessory you can view from anywhere in your home.

Technical Specifications

- 2.4 GHz wireless camera with an operating distance up to 300 ft.
- NTSC Operating System
- Dimensions: 4.6" x 4.6" x 3", weight - 4 lbs.

FCC IDs: OJM-OTX-XXX-KFMSA, TW4-805T

Covered under US Patent # 6,879,255 with an additional patent pending

Wireless Imaging, LLC is a small business registered with the State of Minnesota. It was formed in 2003 and is located in Lino Lakes, MN.

Our Vision:

We are dedicated to providing innovative wireless monitoring, security, and surveillance solutions to parents, homeowners, and small businesses.

We have developed a patented system that will allow our wireless video cameras to operate for extended periods of time on battery power.

Our vision is to integrate this technology with wireless PC/Internet and IP Cameras to provide some of the most beneficial remote monitoring solutions on the market.

Can you imagine monitoring a remote cabin, that doesn't have any A/C power, over the internet or through your cell phone?

We can.

The KwikPeek™ Story

WIRELESS IMAGING, LLC

Originally created as the MailboxCam™, after watching my wife's 88 year old grandfather struggle to check his mailbox several times a day, the KwikPeek camera system has evolved into a state of the art system for a variety of home monitoring functions.

Based on the best features of our original MailBoxCam™, and over 18 months of user feedback, we've redesigned our system to have **the longest battery life on the market** - none of our competitors can operate for more than a few hours without a battery recharge or replacement.

It's lightweight portable design, combined with the patented battery life technology, makes the KwikPeek™, suitable for a variety of security and monitoring uses:

- **Baby monitor**
- **Check who's at the front door**
- **View children playing in the backyard or basement**
- **Driveway/Garage Security**

With the ability to operate up to 3 additional cameras on one system, as well as a portable monitor (pictured bottom right), **our system truly is 100% wireless.**

1. Easily mount the camera dome at the location of your choice.

2. Plug the receiver's power cord into an a/c outlet and the a/v jacks into a television set.

3. Turn the channel on the television to "video". Push the "ON" button of the handheld transmitter and view real time video of your selected location.

Single Camera System Includes:

- One KwikPeek™ Wireless Camera with four channels
- Two 120VA/C power adapters
- One set of A/V cables for connecting the TV and receiver
- One long-range, RF, handheld remote control unit
- One wireless video receiver; 2.4GHz, four-channel

Accessories Include:

- Wireless Portable Monitor (at right)
- Single add-on camera
- Set of 3 add-on cameras
- Additional receiver and key fob for viewing camera(s) on a 2nd TV
